

JEFFREY CLINTON

Professional Curriculum Vitae | Business, Technology & Independent Research

Florida · CHYPHNX@pm.me · [CPX Agency](#) · [GitHub](#) · [Credly](#)

Founder-led venture and technical program development grounded in earlier SolarCity regional leadership, Sunrun district management and Vivint / Platinum area leadership. A cross-disciplinary portfolio linking commercial strategy, evidence-oriented cybersecurity work and systems research.

COMMERCIAL LEADERSHIP & EMPLOYMENT

CPX Agency / CHYPHNX | Founder, Independent Venture & Program Development | *Current*

- Organize commercial plans, requirements and public-safe source evidence across cybersecurity, identity, decision-support and human-systems initiatives.
- Use stage-gated reviews to distinguish research, prototype work and implemented controls; develop partner positioning and public portfolio materials.

SolarCity | Field Sales → Northern California Regional Leadership | *2013–2016*

- Progressed from front-line field sales into regional leadership; supported territory development, recruiting, team coaching and market execution.
- Explained technical solar solutions and financing and coordinated customer requirements with delivery handoffs.

Sunrun | District Management | *Earlier career*

- Supported field and retail-partner activity, coaching, staffing, location performance reviews and operating routines.

Vivint / Platinum | Area Sales Management | *Earlier career*

- Recruited and coached residential security sales teams, supported territory execution and customer-to-installation coordination.

RESEARCH & INDEPENDENT TECHNOLOGY PORTFOLIO

CPX Identity

Merged limited interface; public noncredential identity experience, not live SSO

[View source](#)

Information-boundary safeguards

Merged source/CI discipline for separating public source, restricted IP and synthetic development

[View source](#)

CPX-FEDERAL

Inactive, synthetic-only no-CUI-intake development boundary; no authorization for real CUI

[View source](#)

GHOSTsuite / GHOSTaccess

Security product-family concepts and identity/recovery research; draft components are not deployed services

[View source](#)

TRIDENT v4–v5

Synthetic telecom-defense research and signed simulation telemetry; draft, not carrier deployed

[View source](#)

OMEGA

Quantitative/decision-system research; no verified returns or real-money production authorization

[View source](#)

MissionGrid · THERON · BULLSEYE

Decision support, mission systems and human-systems measurement research; scope and maturity vary

[View source](#)

CPX public portfolio

Brand architecture, product navigation and release governance across program verticals

[View source](#)

PROFESSIONAL QUALIFICATIONS AND STUDY

- IBM Cybersecurity Analyst Professional Certificate — issued 2023 record, training qualification rather than IBM employment.
- Additional issuer-linked learning: IBM security, Wharton strategic and quantitative programs, Stanford/DeepLearning.AI machine learning and Duke decentralized finance.
- University of Maryland Global Campus — cybersecurity and data-science studies; prior coursework at USF and Hampden–Sydney. Completed degrees are not asserted.
- Historical course and badge archive available through the career credential appendix; status and renewals should be independently reviewed.

COMMERCIAL AND TECHNICAL COMPETENCIES

Regional and district operations · Consultative sales · Recruiting and field coaching · Territory strategy · Business development · Stakeholder discovery · Technical partnership narratives · Product requirements · Source-controlled release checks · Security governance research · Public/private data classification · Risk registers · Documentation · Operational change control
